## ACKNOWLEDGMENT

The Fibrinolysis, Thrombolysis, and Blood Clotting Bibliography was compiled by the National Library of Medicine. Citations were processed by the Library's computer-based Medical Literature Analysis and Retrieval System (MEDLARS). They were printed from film composed by Graphic Arts Composing Equipment (GRACE), MEDLARS' high-speed phototypesetter.

## INTRODUCTION

This volume includes all the citations from the 1967 monthly issues of the Fibrinolysis, Thrombolysis, and Blood Clotting Bibliography.

The arrangement is as follows:

(1) In the Subject Section, the citations are listed under selected hematologic headings. Each citation includes a list of all the subject headings under which it has been indexed.

(2) The Author Section lists citations alphabetically by the name of the first author, with cross-references from the second and third authors to the first author.

(3) The Subject Index is an index to all the subject headings.

(4) In the Author Index all the authors of the articles are listed. This provides an approach to all the authors of a citation, since only the first three authors are listed in the Author Section.

(5) The Review Section groups together review articles under selected hematologic headings. These review articles are also listed in the appropriate place in the Subject Section.

This is the second year for the annual compilation of this Bibliography.
